

ADT Environmental Policy Statement

ADT is an independent training organization that is part of a consortium with Coleg Llandrillo and North Wales Training, specialising in delivering quality work based training to a variety of occupations. This is done by training coordinators travelling to employer sites and working with both the employer and learner to deliver a high level of achievement. Commercial training is also delivered at ADT offices.

ADT Ltd is an environmentally conscious organisation, which acknowledges the impact its operations may potentially have on the environment. It is company policy to strive to ensure that its operations have the least harmful effect on the environment. In order to show our commitment to maintaining the environment and preventing pollution, ADT Ltd will work to Green Dragon Environmental Standard requirements.

The main environmental impacts associated with ADT:-

- The use of energy.
- Use of water.
- The production of waste.

To protect the environment ADT shall:-

- Comply with all relevant Environmental Legislation.
- Reduce energy consumption by the use of energy efficient technology where practicable.
- Reduce water consumption by the use of best practices

Our continued commitment to reduce our impact upon the environment will be improved by the introduction of the following:

- Constantly improving performance by setting targets and recording results.
- Reviewing our policies on an annual basis.
- This year the target will be to introduce electronic assessment software to help reduce paper used and replace lighting with energy efficient units.

This year the introduction of paperless system required by the Welsh Government will see a significant drop in the amount of paper used by the company.

This Environmental Policy will be reviewed annually and will be made available to guests, suppliers and members of the public.

To be read in conjunction with the main policy
